FCC INFORMATION

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

CAUTION:

Changes or modifications not expressly approved by Fisher may void the user's authority to operate this equipment.

Note:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

FOR SAFE AND EFFICIENT OPERATION

- Do not damage the power cord.
- When not in use, disconnect the power cord from the outlet. Grasp the plug, not the cord, when disconnecting the unit.
- If water should enter the unit, electrical shock or a malfunction may result. Use in an area where there is low humidity and little dust.
- Do not disassemble or alter the unit in any way.
- Do not use the unit in areas where extremes in temperature occur (below 40°F (5°C) or exceeding 95°F (35°C)), or where it may be exposed to direct sunlight.
- Because of the DVD video player extremely low noise and wide dynamic range, there is a tendency to set the volume on the amplifier higher than necessary. Doing so may produce an excessively high output from the amplifier which can cause damage to your speakers. Please be careful in this regard.
- Sudden changes in the surrounding temperature can cause dew to form on the optical pickup lens inside the unit. Under this condition the unit may be unable to operate properly. If this should occur, remove the disc and allow the unit to adjust to the surrounding temperature.
- **When carrying the unit, be sure to remove a disc which may be inside and turn the power off. Then unplug the power cord from the AC outlet after 10 seconds. Carrying the unit with a disc inside may damage the disc and/or the unit.**

CAUTION:

Placing the unit in a well ventilated area is strongly recommended.

Do not place any object on the top of the unit.

Do not block ventilation holes.

The cabinet of the unit warms up when it is used for a long time, but it is not a malfunction.

Press **[▲]** on the unit (or **[OPEN/CLOSE]** on the remote control) when closing the disc tray. Do not push the disc tray.

WHAT TO DO IF...

If the operation of the unit or display is not normal, even though the appropriate buttons have been pressed.

1. Disconnect the power cord.
2. Press **[RESET]** (bottom of the unit) for at least 20 seconds.
3. Connect the power cord again.
4. Press the desired function button.

**Need help? Call
1-800-421-5013**

The supplied speakers have built-in magnetic stray field compensation. They may be placed close to a TV without affecting the color purity.

The five speakers are all the same and can be used for Front left, Center, Front right, Surround left, and Surround right speakers.

The front, center, and surround speakers should be placed at approximately the same distance from the listening position.

Place the front left and right speakers either side of the TV.

Place the center speaker directly above the TV.

Place the surround speakers either sides of the listening position, or slightly to the rear, approximately 2 feet ~ 3 feet 3 inches (60 cm ~ 1 meter) higher than ear level.

The subwoofer can be placed near the front speaker and not too far from the TV.

Notes:

- The angles in the diagram are approximate.
- Please refer to "Setting Audio" on page E32.

Example: To hang the speaker on a wall

Antenna Connections

FM antenna

The FM indoor antenna lead wire is sufficient to receive most local FM broadcasts and should be connected to the rear FM 75 Ω terminal. Extend the antenna lead wire as straight as possible and, while listening to the sound from the system, secure it in a position where the best FM reception is found.

In fringe areas, or where reception is distorted or noisy, an FM outdoor antenna (not supplied) should be connected instead of the FM indoor antenna lead wire. The terminals will accept 75-ohm coaxial cable.

AM antenna

The AM loop antenna is sufficient to receive most local AM broadcasts. Assemble the loop antenna.

Unwind the antenna wires, then connect them to the AM LOOP terminals. Place the loop antenna in a position which yields the best AM reception, or attach it to a wall or other surface as shown.

Screws (not supplied)

NOTE:

To minimize noise...

- Keep the speaker wires, power cord and all other system connection cables away from the loop antenna.
- Do not place the antenna close to a TV or speaker.

Note to CATV system installer:

This reminder is provided to call the CATV system installer's attention to Section 820-40 of the NEC which provides guidelines for proper grounding and, in particular, specifies that the cable ground shall be connected to the grounding system of the building, as close to the point of cable entry as practical.

- To remove a disc from its storage case, press down on the center of the case and lift the disc out, holding it carefully by the edges.

- Discs should be returned to their cases after use to protect them from dust and scratches.
- To prevent warping the disc, do not expose it to direct sunlight, high humidity or high temperatures for extended periods of time.

Parental Control

MPAA (Motion Picture Association of America) Guideline is a rating system that provides advanced cautionary information to parent about the content of movie programs.

The parental lock level is equivalent to the following MPAA Rating System.

Level 7: NC-17 (No one 17 and under admitted)
Level 6: R (Restricted)
Level 4: PG13 (Parental guidance cautioned)
Level 3: PG (Parental guidance suggested)
Level 1: G (General audiences)

Some DVD discs contain a restriction level which enables parents to prevent playback of discs by children. This DVD video player is equipped with a password designed to prevent children changing the level.

You cannot play DVD video discs rated higher than the level you selected unless you cancel the parental lock function. For example, when you select level "5", the DVD video player will not play discs with ratings of "6", "7" or "8". The information will appear on the TV screen.

If you forget the password...

Enter "788444" even if 4 digits "----" appears, then press [ENTER] to clear the current password.
